DAKSH JAIN

SYSTEMS ENGINEER & FULL-STACK DEVELOPER

PROFESSIONAL SUMMARY

Highly motivated student and systems engineer specializing in custom firmware, cryptography, and automated infrastructure. Proficient in artificial intelligence and robotics with a demonstrated ability to build practical applications, ranging from computer vision models to full-stack web platforms. Recognized internationally for academic and research excellence, seeking a collaborative technical opportunity to apply advanced programming skills and drive innovative projects.

EDUCATION

Brighton International School — **2026 – Present**

Class 9 Student | Raipur, Chhattisgarh, India

TECHNICAL SKILLS

Programming	Python, JavaScript, HTML, CSS
Frameworks & Libraries	React, Vite, Astro, Tailwind CSS, PyTorch, OpenCV
Hardware & Robotics	Raspberry Pi 5, Teensy 4.1, Sensors, Motor Controllers
Core Competencies	Cryptography, Custom Firmware, Deep Learning, Computer Vision, Full-Stack Web

PROJECTS & RESEARCH

Indian Sign Language Translation Model

Developed a computer vision model utilizing PyTorch, OpenCV, and MediaPipe to translate sign language into text, aimed at enhancing accessibility and communication.

SpecLearn AI Educational Platform

Designed and developed the front-end architecture and UI layouts for an AI-powered online learning interface tailored to support students with disabilities.

Severn-Narmada Economic Research

Collaborated on a comprehensive regional economic and strategic infrastructure research project, analyzing global logistics and defense economics.

AI Voice Assistants (Jarvis & OMEGA)

Engineered Python-based desktop voice assistants integrated with advanced system configurations for automated digital task management.

AWARDS & ACHIEVEMENTS

John Locke Institute Global Essay Prize 2026

Shortlisted candidate; formally invited to attend the awards ceremony and gala dinner in London.

Times of India AI Winter Camp 2026

Designed system prompts and project architecture for an AI study bot assignment, showcasing responsible AI utilization on a national platform.

Space Science Outreach & IAAC Certification

Earned certification from the International Astronomy and Astrophysics Competition (IAAC) and engaged with space science institutions following an ISRO workshop.

JITO Education Olympiad

Successfully advanced through multiple competitive rounds testing academic and analytical aptitude.

EXTRACURRICULAR ACTIVITIES

Hack Club Stardance & vivo Ignite Changemakers

Participated in rigorous coding challenges to build, style, and deploy dynamic software projects, submitting innovative, scalable technical project proposals.

Robofest Gujarat 5.0

Engineered custom robotics builds, actively managing component selection, wiring diagrams, and control logic for microcontrollers.

Cylab Security Workshop (2026)

Completed interactive cybersecurity challenge activities, gaining hands-on exposure to digital security protocols.
